

A. M. E. R. I. C. A.

A Seven Point Plan to Defeat the Islamist and Jihadist Agenda

1. **Awaken: *Educate everyone about Islam***

- a. Educate and inform all peoples about Islamic history, and the motivation of radical Islamists to establish a global caliphate.
- b. Clearly explain the totalitarian ideology espoused by jihadists, including their penchant for death to all who oppose their plan.
- c. Tell the whole truth about Islamic terrorism, and explain its very clear linkage to the Islamic faith, without apology. Let the violent history of Islam tell its own story.
- d. Neutralize political correctness wherever you encounter it, particularly when confronted with “Islam is only a religion of peace” and “The term ‘radical Islam’ is offensive to Muslims.”
- e. Babies and ballots matter. Demography matters. Islamists seek to overthrow the United States through covert methods as well as overt violence. Educate everyone about the importance of their role in growing families and voting. Western nations must out-breed and out-vote the Islamist, or accept ultimate defeat like a good lawn can succumb to weeds.

2. **Maintain: *Uphold the U.S. Constitution***

- a. Oppose any and every attempt to impose elements of sharia law in America.
- b. Do not confuse the religious freedom of a Muslim with the need to allow Muslims to establish sharia governance in communities where they constitute a major religious presence.
- c. Opposed the imposition of national restrictions for *halal* food, Islamic hygiene requirements (e.g., public toilets), female requirements for covering with a headscarf, Islamic holidays from public school, and restrictions on freedom of speech about Islam.
- d. You must assimilate to emigrate. You must adapt to our laws and our values or you must leave.
- e. We must preserve, protect and defend the Constitution of the United States from all enemies, foreign and domestic. The insider threat—the Islamist who seeks sharia law—must be recognized and neutralized.

3. **Eliminate: *Destroy the Islamist's economic base***

- a. Freeze all Islamist economic assets wherever you find them and can control them
- b. Recognize and admit the role of Islamic states in the funding of Islamic terrorism, including the leading role of Saudi Arabia in the spread of Wahhabist teachings, and Iran in funding Islamic terror groups.
- c. Fund a national “Manhattan Project” to identify and develop an alternative to petroleum, making petroleum irrelevant for energy production, and eliminating Islamist petrodollar funding sources.
- d. Unleash financial cyber attacks against any and all funding sources of Islamic terror. Take back the initiative and make the enemy wonder how we are so effective using the electronic spectrum.

4. Resist: *Fight using asymmetric force*

- a. The Islamist is a guerilla warrior, fighting what he calls a “civilization jihad”, who unites with his other warriors around the world under a shared ideology. You cannot kill an ideology with tanks or planes.
- b. We must fight the jihadist’s asymmetric forces using our own asymmetric forces, including Special Operations, cyber warfare, and economic warfare.
- c. We must fight with both hands, unhindered by political passivism and bureaucratic delay, by political correctness or internal discord.
- d. Build an international coalition to fight Islamism, in unity. This coalition must include Islamic states such as Jordan, Egypt, Saudi Arabia, and Iraq.
- e. Coalesce global capabilities, yet be prepared for unilateral action if required. Strength in numbers is preferred, but strength through a dedicated, unilateral force that sees victory as the only option will succeed.

5. Initiate: *Kill or be killed*

- a. Jihadists love death as much as we love life.
- b. Jihadists will not lay down their arms for negotiations.
- c. Jihadists are united by an ideology. It is virtually impossible to defeat an ideology unless all of the ideologues are dead.
- d. This is war. We can only win if we annihilate the enemy. Execute the war against Islamic terror with boldness, action, and destruction without regret. Do this with a united front at home and abroad.

6. Commit: *Defend Israel without compromise*

- a. We must stand in complete solidarity with Israel. Any perceived political distance between the United States and Israel will feed the Islamist appetite to strike without fear of retaliation. We cannot show weakness.
- b. As goes Israel, so goes the United States. If we lower our defenses and allow Israel to be attacked, we will suffer the same fate.
- c. We must oppose the formation of a Palestinian state. The Palestinian terror problem is funded by Iran, and Hamas/Hezbollah are Shia Iranian proxies that seek the complete destruction of Israel.
- d. Occupy the lands. Place U.S forces on the ground in Israel to support our ally. Place U.S. forces in neighboring countries that welcome us, such as Jordan. A geographic perimeter manned by U.S. forces allows better defense of Israel and enables the U.S. to launch offensive operations if required.

7. Affirm: *Share Jesus without fear*

- a. All Muslims believe in Jesus. All Muslims believe that Jesus will return to rule the world, and that He will judge all men. We must open a dialogue with Muslims and not shun them. We have a remarkable point of commonality in Jesus, whom they revere and whom Christians worship.
- b. 8 million+ Muslims convert to Christianity each year through dreams/visions of Christ. They are seeking the meaning of those visions. We need to respond.
- c. Exhibit your Christian faith openly and boldly. Counter political correctness with an honest testimony of your personal commitment to Jesus as Lord.
- d. Put your whole trust in Jesus for the outcome of a relationship with a Muslim, and the ultimate outcome of this impending conflict.
